

COVID -19

Dear Pediatric Potentials Families,

The health and safety of our children, their families and our devoted therapists is first and foremost. We are seeing patients in person as our office will remain open with a few modifications. You may discuss the availability of virtual telehealth sessions with your therapist.

Pediatric Potentials has always been committed to a clean and healthy environment. We take pride in this fact. We are diligent in our cleaning protocol. The following procedures are being implemented

- Anyone entering the office, client or parent/guardian must wear a mask at all times. (children 3+ years old)
- You can arrange for pick-up and drop-off at the door with your therapist.
- Only one child and therapist will be in each treatment room at a time.
- We will take extra time between treatment sessions to wipe down and lysol surfaces, as well as clean or remove toys used.

As always, if you or a family member are sick, please do not come to therapy. Please reach out to your therapist to confirm your appointment.

We appreciate your help in ensuring the health and safety of all of us.

Best,
Shoshana Newman PT
Director
Pediatric Potentials
